

Introducing

The Most Comprehensive Line of **Loop-Powered Indicators** *On The Market!*

Joe Ryan

VP of Sales & Marketing

Joe brings more than 15 years of process industry experience in the design, support, manufacturing, marketing, and sales of process measurement and control devices. Joe has extensive field and support experience with process displays and controls, and a strong technical background including a bachelor's degree in Electromechanical Engineering and a master's degree in Computer & Electrical Engineering.

Agenda and Takeaways

01

Introduce the *New Loop Leader+*, *ProtEX+*, and *VantageView+* Series of Loop-Powered Indicators

02

First Look at The Most Complete Line of Loop-Powered Indicators on the Market

03

Why You Want Loop-Powered Indicators

04

Learn About All the Great Features This Line of Loop-Powered Indicators Has to Offer

In 2018...

- ❖ Precision Digital Launched the Loop Leader Series of 1/8 DIN Panel Meters
- ❖ This Radically Improved and Expanded Features and Functionality Expected From Loop-Powered Indicators

Loop Leader
Series

Process Meters

Loop Leader
Series

Feet & Inches Level Meters

Loop Leader
Series

Rate/Totalizers

In 2022...

- ❖ Precision Digital Has Broadened Its Line to Make It the Most Complete Line of Loop-Powered Indicators on the Market!
- ❖ Precision Digital is Proud to Introduce three *New* Additions: The Loop Leader+, ProtEX+, and VantageView+

Loop Leader+
Series

Large Display
NEMA 4X Enclosure

ProtEX+

Explosion-Proof
Aluminum & Stainless Steel

VantageView+

Plastic
NEMA 4X Enclosure

Why Use Loop-Powered Meters?

The most basic decision to make if you want to display a 4-20 mA signal on a digital display is:

- ❖ Should the meter be powered by line voltage or off the 4-20 mA loop?

The three main benefits of Loop-Powered Meters are:

- ❖ No additional power required
- ❖ Easy wiring
- ❖ Additional digital displays can easily be added in the same loop

The above illustrates how a loop-powered meter is wired. Notice there are only two connections made to the meter.

Precision Digital

Why Choose Loop-Powered Meters?

The three most important reasons:

We have been making
loop-powered meters
for almost 40 years!

We understand what
customers want in
loop-powered meters

Our products
have the features
customers want

Common Features of All Product Lines

VantageView+

Common Features of All Product Lines

- ❖ Same Programming Menu, Software, and Functionality
- ❖ Process Meters, F&I Level Meters, and Rate/Totalizers
- ❖ Easy-to-Read Informative Dual-Line Display with Alphanumeric Characters and 20-Segment Bargraph
- ❖ Red Backlight for Enhanced Alarm Indication
- ❖ (2) Open Collector Outputs Standard
- ❖ (2) Loop-Powered Solid-State Relays and 4-20 mA Output Options
- ❖ Free PC-Based MeterView XL USB Programming Software
- ❖ F&I Models Display Level in Feet & Inches
- ❖ Rate/Totalizers Display Rate and Total Simultaneously
- ❖ Indicators for All Locations including Safe Area and Hazardous Areas with Agency Approved Models

Common Features of All Product Lines

*All Meters in This Line
Have the Same...*

Programming Menu

Features & Functions

PC Software

Three Display Types of Loop-Powered Indicators

Process Meters

Feet & Inches Level Meters

Rate/Totalizers

Note: Displays showing are for the ProtEX+ and VantageView+ meters

Easy-to-Read 14-Segment Alphabetic Characters and Commas

7-Segment

14-Segment

- ❖ Notice how much better letters like “T”, “N”, and “K” appear as 14-segment characters vs 7-segment characters found on many other meters.
- ❖ 14-Segment characters are used on the bottom display of all the loop-powered meters in this product line.

- ❖ All totalizers in this product line include commas on the bottom 8-digit display.
- ❖ Seems like a simple thing, but adding commas makes an 8-digit number easier to read.

Red Backlight for Enhanced Alarm Indication

ProtEX+ and VantageView+ Display

Click on
the image to
demonstrate
the flashing
red display

Loop Leader+ Feet & Inches Display

- ❖ Can be programmed to turn the display red for alarm conditions
- ❖ Can be programmed to flash a message along with the process variable
- ❖ Flashing red alarm message can be activated even if no relay or open collector is connected

Dual-Line Display with Dual-Scale Feature

PD6908 Process Meter Showing Input in Feet & Gallons and Toggling Between Process Values and Units.

PD6928 Rate/Totalizer Showing Rate and Total at the Same Time and Toggling Between Process Values and Units

- ❖ All loop-powered process meters in this product line can display the input in two different scales
- ❖ The rate/totalizers can display rate and total at the same time

Two NPN Open Collectors Standard

- ❖ Can be set up for a variety of pulse or alarm outputs
- ❖ Great way to run simple digital signals or small devices like lights and horns
- ❖ Rating: 5-30 VDC @ 150 mA maximum

Two Solid-State Relays Option

Connections for two solid-state relays

- ❖ Models available with two solid-state relays
- ❖ Relays can be assigned to pump alternation, alarm, timer, stopwatch, on/off, or disable

SPECIFICATIONS

Rating

Loop Leader, Loop Leader+:

250 VAC/VDC @ 1A resistive
75VA; 250VAC; 0.6A pilot duty (inductive) – UL Code D300
25VA; 250VDC; 0.6A pilot duty (inductive) – UL Code R300

ProtEX+, VantageView+:

250 VAC/VDC @ 0.5A resistive
38 VA; 250 VAC; 0.3 A pilot duty (inductive)
13 VA; 250 VDC; 0.3 A pilot duty (inductive)

Great For Pump Alternation and Alarm Control

- ❖ Two Solid-State Relays optional feature can be used to control two pumps
- ❖ Can be programmed to alternate the pumps based on either cycle or time
- ❖ Two Open Collectors standard feature can be used to trigger high and low alarms

Note: Loop Leader+ PD4-6604 display is shown in the pump control example.

Rate/Totalizer Used for Batch Control

- ❖ The flow rate/totalizers can be configured as batch controllers
- ❖ On screen presets
- ❖ Multi-stage batching

Isolated 4-20 mA Output

PD6604 Loop Leader Used as a Loop-Powered Remote Indicator & Loop Isolator, Showing Volume

- ❖ Can be used for Loop Isolation
- ❖ Connections are made to terminals labeled mA OUT.
- ❖ 4-20 mA Input & Output must be powered from an external power supply

4-20 mA Output Connections

The Easiest Way to Program Your Loop-Powered Meter

Works for All
Meters in This
Product Line!

Loop Leader+ PD4-6624 rate/totalizer connected to a PC

- ❖ Free PC-Based USB Programming Software
- ❖ Easy Programming of Feature-Packed Product
- ❖ USB Connection Provides Power to the Meter During Programming
- ❖ Save & Print Configuration Files without the Meter Connected
- ❖ Micro USB Cable Provided with the Meter
- ❖ PC Data Logging for One or Multiple Variables

Loop Leader+ Key Features

- ❖ NEMA 4X, IP65 Rated Enclosure, Wall Mountable
- ❖ Large Display Loop-Powered Process Meters, Feet & Inches Level Meters, and Rate/Totalizers
- ❖ Huge 2.8" (71 mm) 5-Character Alphanumeric Top Display and 1.5" (39 mm) 8-Character Alphanumeric Bottom Display
- ❖ 20-Segment Bargraph with Numeric Percent Indication
- ❖ Remote Contacts for Remote Control Station (standard)
- ❖ ATEX and IECEx Certified as Intrinsically Safe Models
- ❖ Light/Horn & Reset Button Accessory
- ❖ Plastic Control Stations Accessories
- ❖ Pipe Mounting Kit Available

Loop Leader+ General Purpose Models

Feet & Inches Meters

PD4-6603-LNN ■ \$1399

PD4-6603-L5N ■ \$1599

Process Meters

VantageView+

ProtEX+ and VantageView+ Key Features

- ❖ CapTouch Through-Window Button Programming
- ❖ 20-Segment Vertical Bargraph
- ❖ Easy Snap-In Electronics Module
- ❖ Display Mountable at 0°, 90°, 180°, & 270°
- ❖ Stainless Steel Tag Accessory
- ❖ Pipe Mounting Kit Available

ProtEX+

- ❖ Housed in Explosion-Proof NEMA 4X, IP68, Die-Cast Aluminum or Stainless Steel Enclosure
- ❖ CSA Certified as Explosion-Proof / Dust-Ignition Proof / Flame-Proof
- ❖ ATEX and IECEx Certified as Intrinsically Safe

VantageView+

- ❖ Housed in NEMA 4X, IP66 Plastic Enclosure
